

Remarks

The specification has been amended to correct for grammar and typographical errors. No new matter is being added. Further, the claims are being amended to correspond with the cancelled claims in the parent application from which the present application is a divisional application.

If Examiner has any questions regarding the case, the Examiner is invited to contact Applicant's undersigned representative at the number given below.

Respectfully submitted,

Stephen M. Key

12/3/01

APPENDIX

Amended specification and claims with markings to show changes

In the Cross Reference to Related Application:

This application is a continuation-in-part of commonly assigned U.S. Patent [Application] No. 6,086,697 [09/126,010 filed on July 29, 1998] issued July 11, 2000 and entitled "Rotating Label System and Method" by Stephen M. Key, the disclosure of which is hereby incorporated by reference. The present application is also related to and incorporates by reference the following patents and patent application: (i) U.S. Patent No. 6,237,269 issued May 29, 2001 for an invention entitled "Roll-Fed Method for Constructing a Rotatable Label System"; (ii) U.S. Patent No. 5,809,674 issued September 22, 1998, entitled "Apparatus and Method For Increasing An Effective Information Carrying Surface Area On A Container"; (iii) U.S. Patent No. 5,884,421 issued March 23, 1999 entitled "Apparatus and Method for Constructing a Rotatable Label Device"; (iv) U.S. Patent No. 6,129,802 issued October 10, 2000, entitled "Rotatable Label System and Method for Constructing the Same"; and (v) U.S. patent application number 09/247,245 filed February 9, 1999 entitled "Rotatable label System Including Tamper-Evident Feature And Method For Constructing Same".

relative to the inner label 205 and the container 200 as discussed below. It should be understood that while FIG. [1] 2 illustrates the adhesive 110 as including three glue dots disposed on the outer label back surface 102[.], [T]those skilled in the art will appreciate [however,] that [the] different numbers, sizes, shapes and patterns of adhesive 110 may also be effectively employed.

In the Claims:

26. (Once Amended) The rotatable label of claim [25]24 wherein the temporary adhesive has a viscosity of about 278 cP at 250°F/27/100 rpm.
34. (Once Amended) The rotatable label of claim [33]32 wherein written indicia is disposed on the back surface.
